## SUBJECT INDEX

Adhesive
Statistical Theory of Strength of Laminated Composites II, p. 30
Aggregated Composites
A Strength Prediction of Aggregated Composites, p. 82
Aluminum
Flexural Properties of Aluminum-Aluminum Oxide Sandwich Composites, p. 182
Factors Influencing the Properties of Whisker-Metal Composites, p. 618
Aluminum Oxide
Flexural Properties of Aluminum-Aluminum Oxide Sandwich Composites, p. 182
Analogy
An Analogy for Certain Anisotropic Plates, p. 355
Analysis
Mechanical Property Tests for Cylindrically Orthotropic Materials, p. 136
Analysis of Anisotropic Plates, p. 148
Approximate Solutions for Unsymmetrically Laminated Plates, p. 189
Free Vibrations of Multilayer Anisotropic Cylindrical Shells, p. 480
Analytical Study of Hugoniot in Unidirectional Fiber Reinforced Composites, p. 500
The Analysis of Unbalanced Cross-Plied Elliptic Plates Under Uniform Pressure, p. 424
On the Solution of Plates of Composite Materials, p. 590
Angle-Plied Laminates
Boron Epoxy Laminate Test Methods, p. 642
Anisotropic Elasticity
Free Vibrations of Unsymmetrically Laminated Anisotropic Plates with Clamped Edges, p. 282
Free Vibrations of Multilayer Anisotropic Cylindrical Shells, p. 480
Anisotropy
The Elastic Constants of Fiber Reinforced Materials, p. 382
Analysis of Anisotropic Plates II, p. 470
Anodic Oxide
Flexural Properties of Aluminum-Aluminum Oxide Sandwich Composites, p. 182
Approximate Solutions
The Elastic Stability of Fibers in a Composite Plate, p. 58
Approximate Solutions for Unsymmetrically Laminated Plates, p. 189
Beam Bending
A Theory of Simple Beams and Columns for Anisotropic Materials, p. 196
Bending, Membrane Coupling
The Analysis of Unbalanced Cross-Plied Elliptic Plates Under Uniform Pressure, p. 424
Bidirectional Composites
Exact Solutions for Composite Laminates in Cylindrical Bending, p. 398
Bi-Linear Materials
Two-Dimensional Bi-Linear Orthotropic Elastic Materials, p. 725
Binary Alloys
On the Stability of a Mixture of Two Elastic Solids, p. 652
Boron
Statistical Theory of Strength of Laminated Composites II, p. 30
More on the Influence of End Constraints on Off-Axis Tensile Tests, p. 202

**Boron-Aluminum**
Fracture Behavior of Shock-Loaded Boron-Aluminum Composite Materials, p. 562
**Boron/Epoxy Composites**
A Method of Predicting for the Nonlinear Behavior of Laminated Composites, p. 2
Compressive Strength of Boron-Epoxy Composites, p. 48
Boron-Epoxy Laminate Test Methods, p. 642
**Buckling of Plates**
Shear Buckling of Unsymmetrical Cross-Ply Plates, p. 359
The Effect of Transverse Shear Deformation on the Bending of Laminated Plates, p. 534
Cylindrical Bending of Unsymmetrically Laminated Plates, p. 715
**Bulk Moduli**
The Elastic Constants of Fiber Reinforced Materials, p. 382
**Carbon Filaments**
Axial Loading of a Unidirectional Composite—Anisotropic Filaments, p. 186
**Carbon FRP**
The Dynamic Properties of Unidirectional Carbon and Glass Fiber Reinforced Plastics in Torsion and Flexure, p. 594
**Ceramic Coating**
Flexural Properties of Aluminum-Aluminum Oxide Sandwich Composites, p. 182
**Circle Size Distribution**
On the Transformation of Histograms with Geometrically Progressing Class Intervals, p. 444
**Circular Inclusion**
Representation of Stress Concentration Factors for a Composite in Plane Strain, p. 108
**Column Bending**
A Theory of Simple Beams and Columns for Anisotropic Materials, p. 196
**Combined Stresses**
Off-Axis Tensile Coupon Testing, p. 586
**Commercial Aircraft Application**
Compressive Strength of Boron-Epoxy Composites, p. 48
**Compatibility Studies**
Development of Nitrided Boron Reinforced Metal Matrix Composites, p. 254
**Complex Moduli**
Measurements of Complex Dynamic Moduli for Laminated Fiber-Reinforced Composites, p. 434
**Composite Behavior**
Limits on Unidirectional Composite Material Properties, p. 728
**Composite Manufacture**
A Continuous Process for the Production of Whisker Reinforced Composites, p. 322
Properties of Graphite Fiber Nonmetallic Matrix Composites, p. 684
**Composite Materials**
Determination of Reinforcement Unbonding of Composites by a Vibration Technique, p. 412
Analytical Study of Hugoniot in Unidirectional Fiber Reinforced Composites, p. 500

Influence of Shear Modulus and Lattice Parameters on the Equilibrium of a Screw Dislocation, p. 664

Composite Parameters
Representation of Stress Concentration Factors for a Composite in Plane Strain, p. 108

Composite Plates
Experimental Study of the Stability of Composite Plates, p. 230

Composite Testing
Properties of Graphite Fiber Nonmetallic Matrix Composites, p. 684

Compressive Strength
Compressive Strength of Boron-Epoxy Composites, p. 48

Concentration Dependence, Physical Properties
The Dielectric Constants of Nonconducting Suspensions, p. 338

Concretes, Design Techniques
A Strength Prediction of Aggregated Composites, p. 82

Continuous Process, Metal-Whisker Composites
A Continuous Process for the Production of Whisker Reinforced Composites, p. 322

Continuum Equations
Elastic Materials with Particle Interactions of Finite Range, p. 294

Crack Growth
Effect of Highly Polarizable Ions on the Strength Retention of Glass Fibers, p. 516

Crossbending Tests
Effect of Highly Polarizable Ions on the Strength Retention of Glass Fibers, p. 516

Cross-Plied
The Analysis of Unbalanced Cross-Plied Elliptic Plates Under Uniform Pressure, p. 424

Cylinders
Free Vibrations of Multilayer Anisotropic Cylindrical Shells, p. 480
Shear-Coupled Waves in a Thin, Helically Wrapped Cylindrical Shell, p. 676

Cylindrical Bending
Exact Solutions for Composite Laminates in Cylindrical Bending, p. 398

Damping
The Dynamic Properties of Unidirectional Carbon and Glass Fiber Reinforced Plastics in Torsion and Flexure, p. 594

Damping Ratios
Measurements of Complex Dynamic Moduli for Laminated Fiber-Reinforced Composites, p. 434

Deflections
Analysis of Anisotropic Plates, p. 148
Analysis of Anisotropic Plates II, p. 470

Design
The Extension of a Superposition Principle to Wave Propagation in Nonhomogeneous Elastic Media, p. 454

Design/Analysis
A Method of Predicting for the Nonlinear Behavior of Laminated Composites, p. 2
Compressive Strength of Boron-Epoxy Composites, p. 48

Determination
Determination of the Graphite Fiber Content of Plastic Composites, p. 702

**Dewetting**
Determination of Reinforcement Unbonding of Composites by a Vibration Technique, p. 412
**Dielectric Constant**
The Dielectric Constants of Nonconducting Suspensions, p. 338
**Dislocations**
Influence of Shear Modulus and Lattice Parameters on the Equilibrium of a Screw Dislocation, p. 664
**Dynamic Behavior**
Fracture Behavior of Shock-Loaded Boron-Aluminum Composite Materials, p. 562
**Dynamic Loads**
The Extension of a Superposition Principle to Wave Propagation in Nonhomogeneous Elastic Media, p. 454
**Dynamic Longitudinal, Shear Modulus**
The Dynamic Properties of Unidirectional Carbon and Glass Fiber Reinforced Plastics in Torsion and Flexure, p. 594
**Dynamic Longitudinal, Young's Modulus**
The Dynamic Properties of Unidirectional Carbon and Glass Fiber Reinforced Plastics in Torsion and Flexure, p. 594
**Dynamics**
Analysis of Anisotropic Plates, p. 148
Dynamic Properties of Metal Power-Epoxy Resin Composites, p. 174
Analysis of Anisotropic Plates II, p. 470

**Eigen-Value Problem**
The Extension of a Superposition Principle to Wave Propagation in Nonhomogeneous Elastic Media, p. 454
**Elastic Compliances**
Representation of Stress Concentration Factors for a Composite in Plane Strain, p. 108
**Elastic Constants**
Representation of Stress Concentration Factors for a Composite in Plane Strain, p. 108
**Elastic Materials**
Elastic Materials with Particle Interactions of Finite Range, p. 294
**Elastic Moduli**
Statistical Theory of Elastic Moduli of Particulate Composites, p. 177
The Elastic Constants of Fiber Reinforced Materials, p. 382
**Elastic Properties**
Boron Epoxy Laminate Test Methods, p. 642
**Elastic Solids**
On the Stability of a Mixture of Two Elastic Solids, p. 652
**Elastic Waves**
Shear-Coupled Waves in a Thin, Helically Wrapped Cylindrical Shell, p. 676
**Elasticity**
Exact Solutions for Composite Laminates in Cylindrical Bending, p. 398
**Elliptic Plates**
The Analysis of Unbalanced Cross-Plied Elliptic Plates Under Uniform Pressure, p. 424

Energy Formulation
Analysis of Anisotropic Plates, p. 148
Energy Methods
Analysis of Anisotropic Plates II, p. 470
Epoxy
The Elastic Stability of Fibers in a Composite Plate, p. 58
Determination of the Graphite Fiber Content of Plastic Composites, p. 709
Experimentation
Mechanical Property Tests for Cylindrically Orthotropic Materials, p. 136
Experimental Study of the Stability of Composite Plates, p. 230
Explosive Welding, Composites
Explosive Welding of Composite Materials, p. 699
Extrusion, of Composites
Flow Orientation of Short Fiber Composites, p. 244
Fabrication
Development of Nitrided Boron Reinforced Metal Matrix Composites, p. 254
Failure Criteria
The Strength of Notched and Damaged Composites, p. 713
Fatigue
Determination of Fracture Sites in Composite Materials with Liquid Crystals, p. 702
Fatigue, Static
Effect of Highly Polarizable Ions on the Strength Retention of Glass Fibers, p. 516
Fiber Bond Stresses
Effect of Fiber Geometry and Partial Debonding on Fiber-Matrix Bond Stresses, p. 116
Fiber Composites
The Elastic Stability of Fibers in a Composite Plate, p. 58
Effect of Fiber Geometry and Partial Debonding on Fiber-Matrix Bond Stresses, p. 116
Oriented Composites by Solidification of Off-Eutectic Mixtures, p. 364
The Elastic Constants of Fiber Reinforced Materials, p. 382
Fiber Damage, Effect of
The Strength of Notched and Damaged Composites, p. 713
Fiber Debonding
Effect of Fiber Geometry and Partial Debonding on Fiber-Matrix Bond Stresses, p. 116
Fiber Flow, in Composites
Flow Orientation of Short Fiber Composites, p. 244
Fiber Geometry
Effect of Fiber Geometry and Partial Debonding on Fiber-Matrix Bond Stresses, p. 116
Fiber Treatment
Properties of Graphite Fiber Nonmetallic Matrix Composites, p. 684
Fiberglass Reinforced Composites
Photoelastic Analysis of Anisotropic Fiber Reinforced Composites, p. 94
Filament Damage
Fracture Behavior of Shock-Loaded Boron-Aluminum Composite Materials, p. 562

**Filament Winding**
Photoelastic Analysis of Anisotropic Fiber Reinforced Composites, p. 94
Residual Strain Distribution in Layered Rings, p. 583

**Finite-Element Method**
More on the Influence of End Constraints on Off-Axis Tensile Tests, p. 202

**Finite Range Interactions**
Elastic Materials with Particle Interactions of Finite Range, p. 294

**Flake Composites**
Anisotropy of Viscosity in Suspensions of Parallel Flakes, p. 705

**Flexural Properties**
Flexural Properties of Aluminum-Aluminum Oxide Sandwich Composites, p. 182

**Flexural Vibration, Plates**
Cylindrical Bending of Unsymmetrically Laminated Plates, p. 715

**Fluid Matrices**
Anisotropy of Viscosity in Suspensions of Parallel Flakes, p. 705

**Fracture**
Statistical Theory of Strength of Laminated Composites II, p. 30
Fracture Behavior of Shock-Loaded Boron-Aluminum Composite Materials, p. 562
Factors Influencing the Properties of Whisker-Metal Composites, p. 618
Determination of Fracture Sites in Composite Materials with Liquid Crystals, p. 702
The Strength of Notched and Damaged Composites, p. 713

**Free Vibration**
Free Vibrations of Multilayer Anisotropic Cylindrical Shells, p. 480

**Glass**
More on the Influence of End Constraints on Off-Axis Tensile Tests, p. 202

**Glass Composition**
Effect of Highly Polarizable Ions on the Strength Retention of Glass Fibers, p. 516

**Glass-Epoxy Composites**
Bending-Extensional Coupling in Laminated Plates Under Transverse Loading, p. 20

**Glass Fibers**
Effect of Highly Polarizable Ions on the Strength Retention of Glass Fibers, p. 516

**Glass FRP**
The Dynamic Properties of Unidirectional Carbon and Glass Fiber Reinforced Plastics in Torsion and Flexure, p. 594

**Graphite**
More on the Influence of End Constraints on Off-Axis Tensile Tests, p. 202

**Graphite-Epoxy Composites**
Bending-Extensional Coupling in Laminated Plates Under Transverse Loading, p. 20
Properties of Graphite Fiber Nonmetallic Matrix Composites, p. 684

**Graphite Filaments**
Axial Loading of a Unidirectional Composite – Anisotropic Filaments, p. 186
Determination of the Graphite Fiber Content of Plastic Composites, p. 709

**Guidelines for Material Development**
Momentless Design of Composite Structures with Variable Elastic Constants, p. 604

Heat Transfer
Analytical Study of Hugoniot in Unidirectional Fiber Reinforced Composites, p. 500

Histogram Transformation
On the Transformation of Histograms with Geometrically Progressing Class Intervals, p. 444

Laminate Nonlinear Behavior
A Method of Predicting for the Nonlinear Behavior of Laminated Composites, p. 2

Laminated Composites
Measurements of Complex Dynamic Moduli for Laminated Fiber-Reinforced Composites, p. 434
Boron-Epoxy Laminate Test Methods, p. 642

Laminated Composites, Ultimate Strength
Ultimate Strengths of Laminated Composites, p. 578

Laminated Plates
Bending-Extensional Coupling in Laminated Plates Under Transverse Loading, p. 20
Analysis of Anisotropic Plates, p. 148
Approximate Solutions for Unsymmetrically Laminated Plates, p. 189
Shear Buckling of Unsymmetrical Cross-Ply Plates, p. 359
Exact Solution for Composite Laminates in Cylindrical Bending, p. 398
The Effect of Transverse Shear Deformation on the Bending of Laminated Plates, p. 534
Cylindrical Bending of Unsymmetrically Laminated Plates, p. 715

Laminates
The End Problem for a Laminated Elastic Strip - I. The General Solution, p. 262
Exact Solutions for Composite Laminates in Cylindrical Bending, p. 398
The End Problem for a Laminated Elastic Strip-II. Differential Expansion Stresses, p. 630

Lamination Theory
The Laminate Approximation for Randomly Oriented Fibrous Composites, p. 720
Stiffness and Expansion Estimates for Oriented Short Fiber Composites, p. 732

Lattice Parameters
Influence of Shear Modulus and Lattice Parameters on the Equilibrium of a Screw Dislocation, p. 664

Libration
Wave Propagation in Libroelastic Materials-Applications to Solid Carbon-Dioxide, p. 220

Liquid Infiltration
Development of Nitrided Boron Reinforced Metal Matrix Composites, p. 254

Long Beam Flexure Test
Boron-Epoxy Laminate Test Methods, p. 642

Metal Matrix Composites
Development of Nitrided Boron Reinforced Metal Matrix Composites, p. 254
Fracture Behavior of Shock-Loaded Boron-Aluminum Composite Materials, p. 562

Mechanical Properties
Mechanical Property Tests for Cylindrically Orthotropic Materials, p. 136
Development of Nitrided Boron Reinforced Metal Matrix Composites, p. 254

**Metal-Whisker Composites**
A Continuous Process for the Production of Whisker Reinforced Composites, p. 322
**Micromechanics**
The Influence of Random Filament Packing on the Transverse Stiffness of Unidirectional Composites, p. 368
**Mohr Circle**
The Importance of Signs of Shear Stress and Shear Strain in Composites, p. 166
**Momentless Criterion**
Momentless Design of Composite Structures with Variable Elastic Constants, p. 604
**Multilayer Shells**
Free Vibrations of Multilayer Anisotropic Cylindrical Shells, p. 480
**Natural Frequencies**
Free Vibrations of Multilayer Anisotropic Cylindrical Shells, p. 480
**Nitrided Boron**
Development of Nitrided Boron Reinforced Metal Matrix Composites, p. 254
**Nondestructive Testing**
Determination of Fracture Sites in Composite Materials with Liquid Crystals, p. 702
**Nonlinear Behavior**
A Method of Predicting for the Nonlinear Behavior of Laminated Composites, p. 2
**Nonlinear Laminate Data**
A Method of Predicting for the Nonlinear Behavior of Laminated Composites, p. 2
**Nonhomogeneous Elastic Media**
The Extension of a Superposition Principle to Wave Propagation in Nonhomogeneous Elastic Media, p. 454
**Nonlinear Stress/Strain Data**
A Method of Predicting for the Nonlinear Behavior of Laminated Composites, p. 2
**Non-Rotating Grip**
More on the Influence of End Constraints on Off-Axis Tensile Tests, p. 202
**Notch Sensitivity**
The Strength of Notched and Damaged Composites, p. 713
**Numerical Analysis**
The Influence of Random Filament Packing on the Transverse Stiffness of Unidirectional Composites, p. 368
**Off-Axis**
More on the Influence of End Constrains on Off-Axis Tensile Tests, p. 202
Off-Axis Tensile Coupon Testing, p. 586
**Off-Eutectics**
Oriented Composites by Solidification of Off-Eutectic Mixtures, p. 364
**Organics**
Oriented Composites by Solidification of Off-Eutectic Mixtures, p. 364
**Orthotropic**
Momentless Design of Composite Structures with Variable Elastic Constants, p. 604
**Particulate Composites**
Statistical Theory of Elastic Moduli of Particulate Composites, p. 177

Wave Propagation in Libroelastic Materials-Application to Solid Carbon-Dioxide, p. 220
Elastic Materials with Particle Interactions of Finite Range, p. 294

Phenolic Resins
Determination of the Graphite Fiber Content of Plastic Composites, p. 709

Photoelastic Analysis
The Elastic Stability of Fibers in a Composite Plate, p. 58
Photoelastic Analysis of Anisotropic Fiber Reinforced Composites, p. 94
Shrinkage Stresses in Two-Phase Materials, p. 308

Plastic Composites
Determination of the Graphite Fiber Content of Plastic Composites, p. 709

Plates
Free Vibrations of Unsymmetrically Laminated Anisotropic Plates with Clamped Edges, p. 282
An Analogy for Certain Anisotropic Plates, p. 355
Exact Solutions for Composite Laminates in Cylindrical Bending, p. 398
Analysis of Anisotropic Plates II, p. 470
On the Nonlinear Oscillations of Plates Composed of Composite Materials, p. 548
On the Solution of Plates of Composite Materials, p. 590

Polar Fields
Wave Propagation in Libroelastic Materials-Application to Solid Carbon-Dioxide, p. 220

Polyimide Resins
Determination of the Graphite Fiber Content of Plastic Composites, p. 709

Pressure Vessels, Ellipsoidal Bulkhead
Momentless Design of Composite Structures with Variable Elastic Constants, p. 604

Properties
Factors Influencing the Properties of Whisker-Metal Composites, p. 618

Random Packing
The Influence of Random Filament Packing on the Transverse Stiffness of Unidirection Composites, p. 368
On the Transformation of Histograms with Geometrically Progressing Class Intervals, p. 444

Reflexion Method
The Elastic Constants of Fiber Reinforced Materials, p. 382

Reinforced Plates
The Elastic Stability of Fibers in a Composite Plate, p. 58

Reinforcement
Mechanical Property Tests for Cylindrically Orthotropic Materials, p. 136
Shrinkage Stresses in Two-Phase Materials, p. 308
The Elastic Constants of Fiber Reinforced Materials, p. 382
The Extension of a Superposition Principle to Wave Propagation in Nonhomogeneous Elastic Media, p. 454
Momentless Design of Composite Structures with Variable Elastic Constants, p. 604

Residual Strain
Residual Strain Distribution in Layered Rings, p. 583

Rigid Constraint
More on the Influence of End Constraints on Off-Axis Tensile Tests, p. 202

**Rotary Inertia**
Wave Propagation in Libroelastic Materials-Application to Solid Carbon-Dioxide, p. 220
**Rotating Grip**
More on the Influence of End Constraints on Off-Axis Tensile Tests, p. 202
**Sandwich Composites**
Flexural Properties of Aluminum-Aluminum Oxide Sandwich Composites, p. 182
Exact Solutions for Composite Laminates in Cylindrical Bending, p. 398
**Shear Coupling**
The Importance of Signs of Shear Stress and Shear Strain in Composites, p. 166
Shear-Coupled Waves in a Thin, Helically Wrapped Cylindrical Shell, p. 676
**Shear Deformation**
The Effect of Transverse Shear Deformation on the Bending of Laminated Plates, p. 534
**Shear Force**
Analytical Study of Hugoniot in Unidirectional Fiber Reinforced Composites, p. 500
**Shear Moduli**
The Elastic Constants of Fiber Reinforced Materials, p. 382
Influence of Shear Modulus and Lattice Parameters on the Equilibrium of a Screw Dislocation, p. 664
**Shear Stress/Strain**
The Importance of Signs of Shear Stress and Shear Strain in Composites, p. 166
Shrinkage Stresses in Two-Phase Materials, p. 308
Determination of Reinforcement Unbonding of Composites by a Vibration Technique, p. 412
**Shells**
Free Vibrations of Multilayer Anisotropic Cylindrical Shells, p. 480
**Shock Hugoniot**
Analytical Study of Hugoniot in Unidirectional Fiber Reinforced Composites, p. 500
**Shock Loaded**
Fracture Behavior of Shock-Loaded Boron-Aluminum Composite Materials, p. 562
**Short Fiber Composites**
The Laminate Approximation for Randomly Oriented Fibrous Composites, p. 720
Stiffness and Expansion Estimates for Oriented Short Fiber Composites, p. 732
**Shrinkage**
Shrinkage Stresses in Two-Phase Materials, p. 308
**Size**
Statistical Theory of Strength of Laminated Composites II, p. 30
**Skew Plates**
An Analogy for Certain Anisotropic Plates, p. 355
**Soils, Design Techniques**
A Strength Prediction of Aggregated Composites, p. 82
**Solid Carbon-Dioxide**
Wave Propagation in Libroelastic Materials-Application to Solid Carbon-Dioxide, p. 220
**Solid Propellant**
Mechanical Property Tests for Cylindrically Orthotropic Materials, p. 136

Solidification
Oriented Composites by Solidification of Off-Eutectic Mixtures, p. 364
Spall Failure
Fracture Behavior of Shock-Loaded Boron-Aluminum Composite Materials, p. 562
Sphere Size Distribution
On the Transformation of Histograms with Geometrically Progressing Class Intervals, p. 444
Stability
The Elastic Stability of Fibers in a Composite Plate, p. 58
Analysis of Anisotropic Plates, p. 148
Experimental Study of the Stability of Composite Plates, p. 230
Analysis of Anisotropic Plates II, p. 470
Statistical Analysis
Statistical Theory of Strength of Laminated Composites II, p. 30
Statistical Theory of Elastic Moduli of Particulate Composites, p. 177
Steady Flow
Analytical Study of Hugoniot in Unidirectional Fiber Reinforced Composites, p. 500
Strain Rate Effects
Dynamic Properties of Metal Power-Epoxy Resin Composites, p. 174
Strength
Statistical Theory of Strength of Laminated Composites II, p. 30
Strength Properties
Boron-Epoxy Laminate Test Methods, p. 642
Strength Retention
Effect of Highly Polarizable Ions on the Strength of Glass Fibers, p. 516
Stress Analysis
The End Problem for a Laminated Elastic Strip - I. The General Solution, p. 262
Stress Concentration
Representation of Stress Concentration Factors for a Composite in Plane Strain, p. 108
Shrinkage Stresses in Two-Phase Materials, p. 308
Stress/Strain Behavior
Boron-Epoxy Laminate Test Methods, p. 642
Superposition Principle
The Extension of a Superposition Principle to Wave Propagation in Nonhomogeneous Elastic Media, p. 454
Tensile Strength
The Strength of Notched and Damaged Composites, p. 713
Tensile Test
More on the Influence of End Constraints on Off-Axis Tensile Tests, p. 202
Test Accuracy
More on the Influence of End Constraints on Off-Axis Tensile Tests, p. 202
Test Methods
Off-Axis Tensile Coupon Testing, p. 586
Boron-Epoxy Laminate Test Methods, p. 642
Testing Fixtures
Effect of Highly Polarizable Ions on the Strength Retention of Glass Fibers, p. 516

**Theory**
Statistical Theory of Strength of Laminated Composites II, p. 30
**Thermal Stresses in Composites**
Thermal Stress Concentrations in the Vicinity of Cylindrical Inclusions, p. 192
The End Problem for a Laminated Elastic Strip-II. Differential Expansion Stresses, p. 630
**Thickness Effects**
Boron-Epoxy Laminate Test Methods, p. 642
**Transformation Relations**
Measurements of Complex Dynamic Moduli for Laminated Fiber-Reinforced Composites, p. 434
**Transverse Stiffness**
The Influence of Random Filament Packing on the Transverse Stiffness of Unidirectional Composites, p. 368
**Unidirectional Composites**
Limits on Unidirectional Composite Material Properties, p. 728
Two-Dimensional Bi-Linear Orthotropic Elastic Materials, p. 725
**Uniform Normal Displacements**
Momentless Design of Composite Structures with Variable Elastic Constants, p. 604
**Unsymmetrical Laminates**
Shear Buckling of Unsymmetrical Cross-Ply Plates, p. 359
**Variable Elastic Constants**
Momentless Design of Composite Structures with Variable Elastic Constants, p. 604
**Vibrations**
Free Vibrations of Unsymmetrically Laminated Anisotropic Plates with Clamped Edges, p. 282
Determination of Reinforcement Unbonding of Composites by a Vibration Technique, p. 412
Measurements of Complex Dynamic Moduli for Laminated Fiber-Reinforced Composites, p. 434
Free Vibrations of Multilayer Anisotropic Cylindrical Shells, p. 480
The Effect of Transverse Shear Deformation on the Bending of Laminated Plates, p. 534
On the Nonlinear Oscillations of Composite Materials, p. 548
**Viscoelasticity**
Determination of Reinforcement Unbonding of Composites by a Vibration Technique, p. 412
**Wave Propagation**
Wave Propagation in Libroelastic Materials-Application to Solid Carbon-Dioxide, p. 220
The Extension of a Superposition Principle to Wave Propagation in Nonhomogeneous Elastic Media, p. 454
**Whiskers**
Factors Influencing the Properties of Whisker-Metal Composites, p. 618
